

Job Vacancy

POSITION	Junior Programmer
OPPORTUNITY	This is a fantastic opportunity to join a small Software House as part of their Development and Support Team. It is a Junior position providing opportunity to further develop your skills and grow with the business
COMPANY	LRD Systems Ltd
BUSINESS	Software Developer, IT Support services
LOCATION	The Heath Business and Technical Park Runcorn Cheshire WA7 4QX
SALARY	Negotiable
HOURS	37.5 per week, would consider part time
ROLE	To provide software applications that meet our Client's business requirements.
SCOPE	The Junior Programmer works in the development team, providing new systems and amending existing ones. The post-holder will primarily develop applications, and will also test, document and support applications.
KEY RESPONSIBILITIES	
<u>Develop New and Amended Software Applications</u>	With guidance from other development team members, develop new applications and changes to existing applications, following Company procedures and guidelines. Attend project and team meetings, and liaise with Programmers and Systems Analysts, management and end users, in discussing system development and design, and demonstrating system changes.

Test Applications

Carry out application testing to ensure changes meet user requirements. Provide user test plans and automated test scripts to ensure all application features are tested.

Document Applications

Write User Guides, Help Files and Update Notes as appropriate, to describe the operation and features of the applications.

Change Control

Apply Company-standard, auditable change control procedures to the central library of source code.

Implement System Changes

Prepare change-scripts to be used during implementation of system changes.

Investigate Application Problems

Working with functional departments and IT Support, identify and resolve problems with the applications.

Product Evaluation

Under guidance from other team members, evaluate new and updated 3rd party software and components, to suit project requirements.
